ABOUT US

Hitacs represents a new business concept that aims to provide an alternative market to the Official Marks in the supply of components used in manufacturing industries associated with the transformation of flexible materials such as leather, fabrics, vinyl materials, technical fabrics and other synthetic materials. Our natural environment is at the "CUTTING ROOM" of the companies listed above. Hence our motto "Cutting Room Solutions"

Hitacs has a clear vocation to "e-Business" Company.

Our project is built around a technology industry experience and over 20 years, which have made remarkable achievements in the field of process automation computer design and cutting machine (CAD / CAM).

Our philosophy: Professionalism + Competitiveness + Value added = Success.

CUTTING ROBOTS ROBOTS DE CORTE

WHOM WE ADDRESS?

Our business philosophy is sustained on two distinct axes, but entirely complementary.

Hitacs potential customer can be located in specialized distribution networks in the "industrial supplies" of raw materials, supplies, tools, machinery, software, technical services and others.

These distributors are active and well-integrated companies in the following industries: shoes, clothing, leather goods, furniture, automotive, graphic arts, packaging and other that transform flexible materials.

The second business line is fed directly from "the manufacturers", sectors described above, who want to enjoy our products but they don't have a local distributor who provides the service.

Our price policy based on quantity discounts, allows a harmonious and profitable partnership with our clients, whatever their profiles and their aspirations.

Our price policy based on quantity discount allows a harmonious and profitable partnership with our customers, which are their profiles and aspirations.

¿QUIÉNES SOMOS?

Hitacs representa un nuevo concepto empresarial que se propone ofrecer al mercado una alternativa, a las marcas oficiales, en el suministro de componentes en uso en las industrias manufactureras vinculadas con la transformación de materiales flexibles, tal como la piel, los tejidos, materiales vinílicos, tejidos técnicos y otros materiales sintéticos. Nuestro entorno natural se sitúa en la "SALA DE CORTE", de las empresas anteriormente catalogadas. De ahí nuestro lema "Cutting Room Solutions"

Hitacs tiene una clara vocación de "e-Business" Company.

Nuestro proyecto se articula en torno a una experiencia sectorial y tecnológica de más de 20 años, donde se han alcanzado logros notables en el campo de la automatización de los procesos de diseño por ordenador y de corte automático (CAD / CAM).

Nuestra filosofía: Profesionalidad + Competitividad + Valor añadido = Éxito.

¿A QUIÉN NOS DIRIGIMOS?

Nuestra filosofía comercial se sostiene sobre dos ejes bien diferenciados, pero totalmente complementarios.

El cliente potencial de **Hitacs** se puede localizar en las redes de distribución especializadas en el "suministro industrial" de materia prima, consumibles, herramientas, maquinaria, software, servicios técnicos y otros.

Dichos distribuidores son empresas activas y perfectamente integradas en los tejidos industriales siguientes: calzado, confección, marroquinería, mueble, automoción, arte gráfico, packaging y otros que transformen materiales flexibles.

La segunda línea de negocio se alimenta directamente de "los propios fabricantes", de los sectores anteriormente descritos, que desean disfrutar de nuestros productos pero que no tienen acceso a un distribuidor local que les facilite el servicio.

Nuestra política de precio, basada en descuento por cantidad, permite una armoniosa y rentable colaboración con nuestros clientes, cual sean sus perfiles y sus aspiraciones.

■ ■ QUINOU-SOMMES ?

Hitacs représente un nouveau concept d'entreprise qui vise à offrir au marché de option nouvelles, une réelle alternative aux marques officielles, dans la fourniture de composants utilisés dans les industries manufacturières liées à la transformation de matériaux souples, tels que le cuir, les tissus, le vinyle, le textile à usage technique et autres matières synthétiques. Notre créneau spécifique se situe dans la «SALLE DE COUPE» des sociétés énumérées précédemment. D'où notre slogan "Cutting Room Solutions"

La vocation affichée par **Hitacs** est clairement celle d'une « e-Business » Company.

Notre projet s'articule autour d'une structure particulièrement solide acquise grâce à une expérience sectorielle et technologique de plus de 20 ans, période au cours de laquelle nous avons obtenu des résultats remarquables dans le domaine de l'automatisation des processus de conception par ordinateur et de découpe automatique (CAO/FAO).

Notre philosophie: professionnalisme + compétitivité + valeur ajoutée = succès.

■ ■ À QUI NOUS ADRESSONS-NOUS ?

Notre philosophie d'entreprise repose sur deux différents axes mais parfaitement complémentaires.

Les clients potentiels de **Hitacs** appartiennent principalement à des réseaux de distribution spécialisés dans l'«approvisionnement industriel» de matières premières, consommables, logiciels, services, outils, machines-outils ou à d'autres secteurs.

Ces distributeurs sont des sociétés actives et parfaitement intégrées dans les réseaux industriels suivants: chaussures, vêtements, maroquinerie, mobilier, automobile, art graphique, emballages (packaging) et toute autre activité spécialisée dans la transformation de matériaux souples.

Le deuxième secteur d'activité consiste à pouvoir directement «des propres fabricants», c'est-à-dire les fabricants appartenant aux secteurs précédemment mentionnés, qui souhaitent profiter de nos produits mais n'ont pas accès à un concessionnaire local pour leur offrir le service. »

Notre politique de prix, basée sur une remise spécifique en fonction de la quantité commandée, garantit une collaboration harmonieuse et rentable avec nos clients, quels que soient, par ailleurs, leurs profils et leurs ambitions.

■ ■ CHI SIAMO ?

Hitacs rappresenta un nuovo concetto imprenditoriale che mira ad offrire al mercato un'alternativa, rispetto ai Marchi ufficiali, con la fornitura di componenti utilizzati nelle industrie manifatturiere associate alla trasformazione di materiali flessibili come pelle, tessuti, materiali vinilici, tessuti tecnici e altri materiali sintetici.

Il nostro ambiente naturale è nella "SALA TAGLIO" delle società citate in precedenza. Da qui il nostro motto "Cutting Room Solutions" (soluzioni per la sala taglio).

Hitacs ha una chiara identità legata al concetto di "e-Business".

Il nostro progetto è costruito intorno ad un'esperienza nel settore della tecnologia di più di 20 anni, durante i quali sono state fatte notevoli conquiste nel campo della progettazione assistita da computer (CAD) e dell'automazione dei processi di taglio robotizzato (CAM).

La nostra filosofia: Professionalità + Competitività + Valore Aggiunto = Successo.

■ ■ A CHI CI RIVOLGIAMO ?

La nostra filosofia aziendale si appoggia su due assi distinti, ma interamente complementari.

Il cliente potenziale dell'**Hitacs** può essere situato nelle reti di distribuzione specializzata nelle "forniture industriali" di materie prime, consumabili, utensili, macchinari, software, servizi tecnici e altri.

Questi distributori sono imprese attive e ben integrate nei seguenti tessuti industriali: scarpe, abbigliamento, pelletteria, arredamento, automotive, arti grafiche, imballaggio e altri settori dove si trasformano materiali flessibili.

La seconda linea di business è alimentata direttamente da "produttori", provenienti dai settori sopra descritti, che vogliono utilizzare i nostri prodotti, ma non hanno accesso a un distributore locale che offra loro il servizio.

La nostra politica dei prezzi è basata su sconti per quantità, permettendo una collaborazione armoniosa e proficua con i clienti, qualunque sia il loro profilo e le loro aspirazioni.

 Tavolo da taglio statico

 Grey cutting Underlays of 2,5 mm of thickness for static cutting machine. Specially developed to offer a high air transmission level, a strong grip coefficient and a good resistance to the cut (long life). Specially recommended to the cutters without vacuum sector control (M - L - XL - 2XL - LC 2400 PLUS) and working with the EOT (electric tool).

Green cutting Underlays of 4 mm of thickness for static cutting machine.

Specially developed to offer a good air transmission level, a strong grip coefficient and an optimum resistance to the cut (long life). Specially recommended to the cutters with a last vacuum system generation, working with the EOT (electric tool) or for all cutter models working with the POT (pneumatic tool).

 Superficie de corte GRIS de 2,5 mm. para mesas de corte estáticas. Especialmente desarrollado para permitir el paso de un elevado caudal de aire, ofrecer un importante coeficiente de agarre y una óptima resistencia al corte (larga vida). Especialmente recomendado para sistemas de vacío no sectorizados (M - L - XL - 2XL - LC-2400 Plus) con la herramienta EOT (eléctrica). **Superficie de corte VERDE de 4 mm.** para mesas de corte estáticas. Especialmente desarrollado para permitir el paso de un elevado caudal de aire, ofrecer un importante coeficiente de agarre y una óptima resistencia al corte (larga vida). Especialmente recomendado para sistemas de vacío de última generación con la herramienta EOT (eléctrica) o con cualquier modelo de máquina usando la herramienta POT (neumática).

 **Gris:** Bande de coupe de 2,5 mm d'épaisseur pour robot de coupe statique. Spécialement développée pour offrir un niveau de transmission d'air élevé, un coefficient d'adhérence exceptionnel et une bonne résistance à la coupe (longue vie). Spécialement recommandé pour accompagner les tables de coupe sans système d'aspiration sectorisé (M - L - XL - 2XL - LC 2400 PLUS) et travaillant avec la EOT (outil électrique).

Vert bande de coupe de 4 mm d'épaisseur pour machine de découpe statique. Spécialement développée pour offrir un niveau de transmission de l'air élevé, un coefficient d'adhérence forte et une optimale résistance à la coupe (longue vie). Spécialement recommandé pour les tables coupe munies d'un système d'aspiration moderne, en collaboration avec l'EOT (outil électrique) ou pour tous les modèles de robot avec POT (outil pneumatique).

 **Nastro di taglio grigio da 2,5 millimetri di spessore**, per tavoli da taglio statici. Appositamente sviluppato per consentire il passaggio d'un elevato flusso d'aria, garantire un alto fattore d'aderenza e un'ottimale resistenza al taglio (lunga vita). Particolarmente indicato per i sistemi di taglio con aspirazione, non settorizzata (M - L - XL - 2XL - 3XL - LC-2400 Plus) con mandrino EOT (elettrico).

Nastro di taglio verde da 4 millimetri di spessore, per tavoli da taglio statici. Appositamente sviluppato per consentire il passaggio d'un elevato flusso d'aria, garantire un alto fattore d'aderenza e un'ottimale resistenza al taglio (lunga vita). Particolarmente consigliato per i sistemi a vuoto di nuova generazione, con mandrino EOT (elettrico) o qualsiasi modello di macchina con il mandrino pneumatico POT.

 **Green conveyor belt of 4mm** of thickness for cutters with conveyor system. Specially developed to offer a good air transmission level, a strong grip coefficient and an optimum resistance to the cut (long life). Specially recommended for an intensive production cadence and working with the POT (pneumatic tool). **Grey conveyor belt of 2,5mm** of thickness for cutters with conveyor system. Specially developed to offer a high air transmission level, a strong grip coefficient and a good resistance to the cut (long life). Specially recommended for a standard production cadence and working with the EOT (electric tool).

 Banda conveyor anti-corte **VERDE de 4 mm.** para mesas de corte con sistema conveyor (banda giratoria). Especialmente desarrollado para permitir el paso de un elevado caudal de aire ofrecer un importante coeficiente de agarre y una optima resistencia al corte (larga vida). Especialmente recomendado para ritmos intensivos de producción y uso de la herramienta POT (neumática). **Banda conveyor anti-corte GRIS de 2,5 mm.** para mesas de corte con sistema conveyor (banda giratoria). Especialmente desarrollado para permitir el paso de un muy elevado caudal de aire, ofrecer un importante coeficiente de agarre y una óptima resistencia al corte (larga vida). Especialmente recomendado para ritmos normales de producción y uso de la herramienta EOT (eléctrica).

 **Vert thibaude de coupe de 4 mm** d'épaisseur pour machine de découpe conveyor. Spécialement développée pour offrir un niveau de transmission de d'air élevé, un coefficient d'adhérence forte et une optimale résistance à la coupe (longue vie). Spécialement recommandé pour les tables coupe munies d'un système d'aspiration moderne, en collaboration avec l'EOT (outil électrique) ou pour tous les modèles de robot avec POT (outil pneumatique). **Gris: Bande de coupe de 2,5 mm** d'épaisseur pour robot de coupe conveyor. Spécialement développée pour offrir un niveau de transmission d'air élevé, un coefficient d'adhérence exceptionnel et une bonne résistance à la coupe (longue vie). Spécialement recommandé pour accompagner les tables de coupe sans système d'aspiration sectorisé (M - L - XL - 2XL - LC 2400 PLUS) et travaillant avec l'EOT (outil électrique).

 **Nastro trasportatore di taglio verde di 4 mm.** per tavoli da taglio con sistema di trasporto (banda conveyor). Appositamente sviluppato per consentire il passaggio d'un elevato flusso d'aria garantire un alto fattore d'aderenza e un'ottimale resistenza al taglio (lunga vita). Specialmente consigliata per i tassi di produzione intensiva e l'uso del mandrino POT (pneumatico). **Nastro trasportatore di taglio grigio di 2,5 mm.** per tavoli da taglio con sistema di trasporto (banda conveyor). Appositamente sviluppato per consentire il passaggio d'un elevato flusso d'aria garantire un alto fattore d'aderenza e un'ottimale resistenza al taglio (lunga vita). Specialmente consigliata per moderato ritmo di produzione e l'uso del mandrino EOT (Elettrico).
